DIVUS CIRCLE

A VISION BECOMES REALITY

DIVUS had a vision – with an irrefutable belief in itself and its ability, DIVUS pursued this vision on the long path to perfection and expressed it in DIVUS CIRCLE. The result far exceeded our expectations. The combination of the timelessly reduced design and

the innovative features form a smart device of the highest sophistication and exclusivity. DIVUS CIRCLE is the ideal fusion of form and function – it has become visible perfection.

„Our design process began with the search for the extraordinary, an appearance that leaves the mass of ever-similar products behind while meeting the taste of the crowd.

A form that welcomes the user directly at the front door, at the gate, or at the internal reception and communicates through its changeability on different levels.

The answer was the CIRCLE.

Almost magical, like an aura, the backlight shines at dusk. The soft lighting brightens the entrance area and provides an unobtrusive additional security and serves as a guide.

Circle automates everyday functions in an individual way and provides security and transparency in an ever-changing environment.“

Christian Zanzotti, Designer

DIVUS CIRCLE

AWARD-WINNING & EXCELLENT.

The juries were the same opinion: Form and function unite in a unique way to DIVUS CIRCLE.

It is door station, wall lamp and digital bodyguard all-in-one – the optimal product at your front door.

DIVUS CIRCLE has won several prestigious awards:

Not only the exceptional shape, an appearance clearly different from the competition and setting new standards, but also the smart, innovative features, the easy and intuitive operation and the high quality of the product are honored.

INNOVATION

The classic features of the doorbell are being upgraded, ushering in a new era of door intercom systems. This video intercom system convince with his innovative aesthetics and the modern technology. A smart building can now be recognized right at the front door.

DIVUS CIRCLE is equipped with a camera with day and night vision, as well as a fisheye lens. Speaker and microphone with echo cancelling guarantee perfect call

quality even with loud street noise.

DIVUS CIRCLE becomes a digital butler that is omnipresent and always available, reliably accepting and passing on messages. At the same time he is your personal butler and guard of your house. Guests are greeted, skeptically observed or decidedly rejected, depending on preset preferences and scenarios the resident has chosen.

EASY & INTUITIVE

The integrated LCD touch display guarantees optimal usability of the innovative features of DIVUS CIRCLE. The user interface has been designed to be intuitive and easy to use - and this for both the homeowner in the configuration, as well as for the visitor in daily use. The user interface is designed that the color scheme

and the dashboard information can be configured by the homeowner according to their personal taste.

The use of the DIVUS CIRCLE by the visitor is characterized by continuous feedback. The intercom interacts with the guest, what makes you feel comfortable with every action you are taking.

BUTLER & BODYGUARD

Thanks to a proximity sensor, CIRCLE awakes at a distance of 8m. An individual avatar appears, which acts as a digital butler, greeting or „observing“ visitors.

The homeowner can make these settings himself in advance through a convenient and intuitive configuration, depending on personal preferences and needs, e.g. day or night time, day of the week, vacation. He chooses between the predefined profiles „Friendly“, „Skeptical“ and „Bodyguard“.

From 1.5 meters, the integrated infrared motion detector reacts. The avatar leaves its place to the selected dashboard. During the day, personal information such as address, family name and family photo can be shown. The homeowner decides for himself how much he wants to display.

DIVUS CIRCLE takes on the tasks of a reliable and ubiquitous butler and protector in a modern and pioneering way.

APPLICATION

DIVUS CIRCLE is extremely versatile: from single-family homes and villas to condominiums and office towers – the size of the property is not an issue for DIVUS CIRCLE. In large, complex residential buildings and office towers, the touchdisplay enables the placement of all names or residential parties in telephone book look. The necessary data can be displayed and selected with convenient and commonly known swipe gestures.

The SIP-based DIVUS CIRCLE also takes over the

function of an answering machine, since voice messages are accepted and can be called upon by the indoor call station. On request, photos can be taken and saved temporarily of any visitor.

DIVUS CIRCLE is equipped with an RFID receptor, which eliminates the need for a key. A temporary access code gives you the possibility to allow certain people exclusive access to the building at predefined times.

WALL LIGHT

The CIRCLE is installed in the wall with his mounting box. The 8mm thick wall structure gives the impression of a weightless floating object. The glass hides the powerful and energy-saving RGB LED ring. It is designed so that

it can function as a full-fledged wall lamp. The color of the LEDs can be set by the homeowner at will and wrap his entrance in a pleasant color. The brightness sensor regulates the strength of the LEDs.

BUNDLE

In combination with the permanently installed DIVUS TOUCHZONE touch panel and a user interface DIVUS VIDEOPHONE, DIVUS CIRCLE is a complete and innovative door intercom. It is designed to provide total

comfort, increased security and elegant design.

As a complete system, this innovative bundle sets new standards in door communication and integrated building automation.

DIVUS CIRCLE small

We like to call the CIRCLE small the little brother of the DIVUS CIRCLE. Despite the smaller external dimensions, he is the „big“ in hardly anything. So he is a fully functional, SIP-based video door intercom station including capacitive bell, camera, proximity sensor and RFID module. The CIRCLE S is available with or without display.

It is intended to be used as an indoor unit in condominiums, in side entrances or backdoors.

The rear LED ring shines in a white, pleasant light. It is strong enough to illuminate the entrance area independently. So CIRCLE S also makes a great figure as a full-fledged wall lamp.
